

7/8 Choice Assignment

Directions: Choose any two assignments from each class and complete by Friday 2/17/12.

Math	Reading
Find the ratio of people to rooms in your house or apartment. Use this ratio to determine how many rooms a “family” of 20 people would have.	Find examples of 5 forms of figurative language in any text. (newspaper, magazine, novels)
Cut out an ad for a food you like. Find out what your total cost would be if you bought 4 with a 7% tax rate.	Find any nonfiction article and complete the nonfiction outline
Go to http://www.mathplayground.com/locate_aliens.html . Practice your skill on plotting coordinate points by locating the aliens. Use a coordinate grid from Ms. Andrews’ room to keep track of the points you located.	List 10 words and use etymology to give the breakdown meaning (Identify each part of the word)
Come up with your own list of approximations to describe each of the following: kilometer, meter, centimeter, millimeter, kilogram, gram, milligram, liter, millimeter	Create a plot development map for a movie or show of your choice
Figure out how many miles there are from Chicago to another city of your choice in the US (outside of Illinois). Convert this number to feet. Write your answer in scientific notation.	Search any source (book, article, etc.) for a word you don’t know. Use context clues and make a guess about its meaning. Write the sentence it was used in and how you made your guess.
